Future Shock By Elizabeth Briggs

A *New York Times* bestseller!

What do you do when the future is too late, and the present is counting down to an inevitable moment?

Elena Martinez has street smarts, the ability for perfect recall, and a deadline: if she doesn't find a job before she turns eighteen, she'll be homeless. But then she gets an unexpected offer from Aether Corporation, the powerful Los Angeles tech giant. Along with four other recruits--Adam, Chris, Trent, and Zoe--Elena is being sent on a secret mission to bring back data from the future. All they have to do is get Aether the information they need, and the five of them will be set for life. It's an offer Elena can't refuse.

But something goes wrong when the time travelers arrive in the future. And they are forced to break the only rule they were given--not to look into their own fates. Now they have twenty-four hours to get back to the present and find a way to stop a seemingly inevitable future--and a murder--from happening. But changing the timeline has deadly consequences too. Who can Elena trust as she fights to save her life?

The first book in an unforgettable series about rewriting your destiny in the city of dreams.

Editorial Review

From School Library Journal

Gr 8 Up—Elena believes that her eidetic, or photographic, memory makes her a freak, and moving from foster home to foster home after her father ends up in prison for killing her mother only reinforces her thinking. Being different in foster care is asking for trouble, and her violent temper surfaces as she defends other foster children who are bullied. When high-tech Aether Corporation promises to reimburse her for her participation in a research project to the extent that she could support herself for the rest of her life, she can't say no, even when the project involves a dangerous time travel experiment. Four other teens with special skills, including three from foster care, are recruited with her, and together, they forge into the unknown, with deadly consequences none of them could have predicted. Everything that can go wrong does, and the teens are left to deal with the past as well as the future on their own, unsure if they can trust one another or the Aether scientists who are using them. This is an entertaining science fiction murder mystery that doesn't particularly stand out but should appeal to James Patterson fans along with readers of Michael Grant's "Gone" series (HarperCollins). VERDICT A good fit for collections serving science fiction fans and teens in marginalized situations, who will appreciate the attention given to the emotional consequences of the foster care experience.—Kerry Sutherland, Akron-Summit County Public Library, OH

"The author refreshingly swaps teen-lit gender stereotypes in the fairly formulaic but nonetheless satisfying romance: she's the edgy, brooding girl with the heart of gold, and he's the adorable, inexperienced good guy. An absorbing, if occasionally predictable, time-travel mystery with a side of romance." Kirkus Reviews, February 15, 2016
