Anaesthesia and Intensive Care A-Z E-Book: An Encyclopedia of Principles and Practice (FRCA Study Guides) By Steven M. Yentis, Nicholas P. Hirsch, James Ip

Building on the success of previous editions, *Anaesthesia and Intensive Care A-Z (Fifth edition)* remains the most comprehensive single volume source of relevant aspects of pharmacology, physiology, anatomy, physics, statistics, medicine, surgery, general anaesthetic practice, intensive care, equipment, and the history of anaesthesia and intensive care.

Originally prepared as essential reading for candidates for the Fellowship of the Royal College of Anaesthetists and similar exams, this fully updated edition will also prove as invaluable as ever for all anaesthetists and critical care physicians, as well as operating department practitioners and specialist nurses.

All entries have been carefully reviewed and new ones added to reflect the latest advances and the evolving field breadth. This edition includes a structured checklist of entries, ordered by curriculum core topic area, as an additional new aid for those planning their revision.

Editorial Review

Review

An incredible amount of information is to be found in detailed but concise entries intelligently arranged and cross-referenced. It is an easy-to-use, fast reference text of value to FRCA students, their tutors, jobbing anaesthetists and their assistants.

Anaesthesia

There was not much room for improvement from the previous editions of this book, but this has been achieved. Not only aesthetically ... but also with the content update and clearer illustrations. We would recommend this book to all anaesthetists in training.

British Journal of Anaesthesia

An invaluable text for those at any stage of training and to those who wish to use it as a ready reference text...an essential addition to any anaesthetic department for both anaesthetists and intensive care practitioners.

International Journal of Obstetric Anesthesia
