Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition By Mica R. Endsley

The barrage of data overload is threatening the ability of people to effectively operate in a wide range of systems including aircraft cockpits and ground control stations, military command and control centers, intelligence operations, emergency management, medical systems, air traffic control centers, automobiles, financial and business management systems, space exploration, and power and process control rooms. All of these systems need user interfaces that allow people to effectively manage the information available to gain a high level of understanding of what is currently happening and projections on what will happen next. They need systems designed to support situation awareness.

Addressing the information gap between the plethora of disorganized, low-level data and what decision makers really need to know, **Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition** provides a successful, systematic methodology and 50 design principles for engineers and designers seeking to improve the situation awareness of their systems' users based on leading research on a wide range of relevant issues.

See what's new in the Second Edition:

- Significantly expanded and updated examples throughout to a wider range of domains New Chapters: *Situation Awareness Oriented Training* and *Supporting SA in Unmanned and Remotely Operated Vehicles*
- Updated research findings and expanded discussion of the SA design principles and guidelines to cover new areas of development

Mica R. Endsley is a pioneer and world leader in the study and application of situation awareness in advanced systems. Debra G. Jones work is focused on designing large-scale and complex systems to support situation awareness and dynamic decision making. Completely revised and updated, liberally illustrated with actual design examples, this second edition demonstrates how people acquire and interpret information and examines the factors that undermine this

process. Endsley and Jones distill their expertise and translate current research into usable, applicable methods and guidelines.

Users Review

From reader reviews:

Lucy Fletcher:

Your reading sixth sense will not betray a person, why because this Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition publication written by well-known writer we are excited for well how to make book that could be understand by anyone who have read the book. Written within good manner for you, still dripping wet every ideas and creating skill only for eliminate your personal hunger then you still hesitation Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition as good book not just by the cover but also with the content. This is one book that can break don't evaluate book by its handle, so do you still needing yet another sixth sense to pick this particular!? Oh come on your examining sixth sense already alerted you so why you have to listening to one more sixth sense.

Erwin Fast:

This Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition is great publication for you because the content and that is full of information for you who all always deal with world and have to make decision every minute. This specific book reveal it data accurately using great manage word or we can declare no rambling sentences inside. So if you are read it hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but difficult core information with wonderful delivering sentences. Having Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition in your hand like having the world in your arm, details in it is not ridiculous 1. We can say that no reserve that offer you world in ten or fifteen small right but this guide already do that. So , this is good reading book. Hello Mr. and Mrs. occupied do you still doubt that will?

Andrew Spivey:

In this era globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher that print many kinds of book. Typically the book that recommended to you personally is Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition this book consist a lot of the information of the condition of this world now. This specific book was represented so why is the world has grown up. The words styles that writer require to explain it is easy to understand. The writer made some analysis when he makes this book. This is why this book acceptable all of you.

Karl Irwin:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from a book. Book is prepared or printed or created from each source this filled update of news. With this modern era like today, many ways to get information are available for you actually. From media social like newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just searching for the *Designing for Situation Awareness: An Approach to User-Centered Design, Second Edition* when you needed it?
