Predictive Analytics with Microsoft Azure Machine Learning 2nd Edition

By Valentine Fontama, Roger Barga, Wee Hyong Tok

Predictive Analytics with Microsoft Azure Machine Learning, Second Edition is a practical tutorial introduction to the field of data science and machine learning, with a focus on building and deploying predictive models. The book provides a thorough overview of the Microsoft Azure Machine Learning service released for general availability on February 18th, 2015 with practical guidance for building recommenders, propensity models, and churn and predictive maintenance models.

The authors use task oriented descriptions and concrete end-to-end examples to ensure that the reader can immediately begin using this new service. The book describes all aspects of the service from data ingress to applying machine learning, evaluating the models, and deploying them as web services.

Learn how you can quickly build and deploy sophisticated predictive models with the new Azure Machine Learning from Microsoft.

What's New in the Second Edition?

Five new chapters have been added with practical detailed coverage of:

- Python Integration – a new feature announced February 2015
- Data preparation and feature selection
- Data visualization with Power BI
- Recommendation engines
- Selling your models on Azure Marketplace

Playing with family within a park, coming to see the coastal world or hanging out with close friends is thing that usually you will have done when you have spare time, subsequently why you don't try matter that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Predictive Analytics with Microsoft Azure Machine Learning 2nd Edition, you can enjoy both. It is very good combination right, you still need to miss it? What kind of hang type is it? Oh can happen its mind hangout men. What? Still don't buy it, oh come on its identified as reading friends.

Deborah Wilkerson:

As a scholar exactly feel bored to help reading. If their teacher inquired them to go to the library as well as to make summary for some guide, they are complained. Just minor students that has reading's internal or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that studying is not important, boring as well as can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways

to reach Chinese's country. So , this Predictive Analytics with Microsoft Azure Machine Learning 2nd Edition can make you sense more interested to read.
