Editorial Review

From the Back Cover

From the co-author of *Sensory Evaluation of Foods, Principles and Practices*, this lab manual is a fitting accompaniment to that text in an undergraduate or graduate course in sensory evaluation of foods. The manual includes introductory information, such as report formats (both academic and industrial), as well as a series of eleven full-length lab exercises suitable for a three-hour laboratory period. There are also four shorter exercises suitable for a traditional class period, and one group exercise suitable for a semester project in descriptive analysis and terminology building. Correct use of graphs, tables and statistics is emphasized in several sections. Each exercise includes both a student section and one for instructors and teaching assistants, which features detailed instructions with supplies, equipment, preparation procedures, ballots and data sheets. Each instructor section also includes “keys to successful execution,” which cover common mistakes and important details, designed to give the students the maximum opportunity for a rich learning experience. A group of statistical problem sets is included to reinforce common statistical analyses used with sensory data. Methods encountered include discrimination, descriptive, affective/hedonic, scaling, thresholds, panelist screening, shelf life and consumer questionnaires. Critical thinking and discussion questions are emphasized above and beyond the rote learning of a specific procedure. For classes that may be offered to less advanced students, suggestions are made in the instructor sections on how the exercise or report can be simplified. The exercises were compiled and refined over two decades and used in an upper level course in sensory testing at Cornell University.

About the Author

Harry T. Lawless is Professor Emeritus in the Department of Food Science, Cornell University.

Users Review

From reader reviews:

Joyce Adam:

Do you have favorite book? When you have, what is your favorite's book? E-book is very important thing for us to be aware of everything in the world. Each reserve has different aim as well as goal; it means that book has different type. Some people experience enjoy to spend their time and energy to read a book. They are reading whatever they consider because their hobby is usually reading a book. What about the person who don't like examining a book? Sometime, man feel need book whenever they found difficult problem as well as exercise. Well, probably you will want this Laboratory Exercises for Sensory Evaluation (Food Science Text Series).

Grady Long:

The book Laboratory Exercises for Sensory Evaluation (Food Science Text Series) can give more knowledge and information about everything you want. So why must we leave the good thing like a book Laboratory Exercises for Sensory Evaluation (Food Science Text Series)? A few of you have a different opinion about

e-book. But one aim which book can give many information for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or info that you take for that, it is possible to give for each other; it is possible to share all of these. Book Laboratory Exercises for Sensory Evaluation (Food Science Text Series) has simple shape nevertheless, you know: it has great and big function for you. You can look the enormous world by open up and read a reserve. So it is very wonderful.
