### **Editorial Review**

#### Review

"I really like the online lecture, if by any chance a class is missed it would be nice. The videos on how to do a problem. Visual aid is a good thing. The length of the book, the price is excellent!"Peter Rosito, Middlesex County Community College.

"I am excited to see this new learning style hit the shelves. I use the web for about 75% of my math work. I absolutely love it. I really like the weight and size of your magazine. The cost seems amazing aside from the physical convenience. The notecards and the setup are a very intelligent layout for modern day education. I hope to see this product on shelves soon. Educational games (learning games) would be an excellent edition. 3 words--convenient, lightweight, smart idea."Thomas Scott Dykes, Glendale Community College.

"I would definitely be likely to use these tools. I love the ecofriendly ideas and the various tools contained within. I hate to spend money on a textbook that I will not use outside of class. I currently engage in online learning for my Biology class using videos, podcasts, flashcards...etc."Danielle Templeton, Glendale Community College.

Very interactive textbook with a large amount of online resources and innovative and especially helpful when students are struggling and they can't get in touch with the instructor.Laine Winokur, Mount Holyoke College.

"...this book is very helpful. It's like having your own personal tutor. It's very cheap and straight to the point. Something that would help you pass your class and give you a good understanding of the class. The textbook will help people do well in his/her class. It will help students prepare for exams/quizzes. It comes with a lot of features."Moni Olusekun, University of Massachusetts, Amherst.

#### About the Author

Karl Smith is professor emeritus at Santa Rosa Junior College in Santa Rosa, California. He has written over 36 mathematics textbooks and believes that students can learn mathematics if it is presented to them through the use of concrete examples designed to develop original thinking, abstraction, and problem-solving skills. Over one million students have learned mathematics from Karl Smith's textbooks.
