Real-Time Shader Programming (The Morgan Kaufmann Series in Computer Graphics) By Ron Fosner

Now that PC users have entered the realm of programmable hardware, graphics programmers can create 3D images and animations comparable to those produced by RenderMan's procedural programs--but in real time. Here is a book that will bring this cutting-edge technology to your computer. Beginning with the mathematical basics of vertex and pixel shaders, and building to detailed accounts of programmable shader operations, Real-Time Shader Programming provides the foundation and techniques necessary for replicating popular cinema-style 3D graphics as well as creating your own real-time procedural shaders. A compelling writing style, color illustrations throughout, and scores of online resources make Real-Time Shader Programming an indispensable tutorial/reference for the game developer, graphics programmer, game artist, or visualization programmer, to create countless real-time 3D effects.

* Contains a complete reference of the low-level shader language for both DirectX 8 and DirectX 9 * Provides an interactive shader demonstration tool (RenderMonkeyTM) for testing and experimenting * Maintains an updated version of the detailed shader reference section at www.directx.com * Teaches the latest shader programming techniques for high-performance real-time 3D graphics

Editorial Review

Users Review

From reader reviews:

Adam Jones:

Book is definitely written, printed, or illustrated for everything. You can learn everything you want by a e-book. Book has a different type. We all know that that book is important matter to bring us around the world. Adjacent to that you can your reading expertise was fluently. A e-book Real-Time Shader Programming (The Morgan Kaufmann Series in Computer Graphics) will make you to become smarter. You can feel far more confidence if you can know about anything. But some of you think this open or reading any book make you bored. It's not make you fun. Why they might be thought like that? Have you searching for best book or appropriate book with you?

Bradley Loy:

The feeling that you get from Real-Time Shader Programming (The Morgan Kaufmann Series in Computer Graphics) is a more deep you searching the information that hide in the words the more you get considering reading it. It doesn't mean that this book is hard to understand but Real-Time Shader Programming (The Morgan Kaufmann Series in Computer Graphics) giving you excitement feeling of reading. The writer conveys their point in a number of way that can be understood by simply anyone who read the idea because the author of this guide is well-known enough. This book also makes your vocabulary increase well. So it is easy to understand then can go with you, both in printed or e-book style are available. We propose you for having this kind of Real-Time Shader Programming (The Morgan Kaufmann Series in Computer Graphics) instantly.

Benjamin Nation:

This book untitled Real-Time Shader Programming (The Morgan Kaufmann Series in Computer Graphics) to be one of several books which best seller in this year, that's because when you read this publication you can get a lot of benefit on it. You will easily to buy this book in the book retail store or you can order it through online. The publisher with this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Mobile phone. So there is no reason to your account to past this guide from your list.

Preston Garza:

Do you have something that you like such as book? The book lovers usually prefer to decide on book like comic, small story and the biggest the first is novel. Now, why not attempting Real-Time Shader

Programming (The Morgan Kaufmann Series in Computer Graphics) that give your satisfaction preference will be satisfied simply by reading this book. Reading addiction all over the world can be said as the opportunity for people to know world much better than how they react in the direction of the world. It can't be mentioned constantly that reading behavior only for the geeky person but for all of you who wants to become success person. So , for every you who want to start reading through as your good habit, it is possible to pick Real-Time Shader Programming (The Morgan Kaufmann Series in Computer Graphics) become your starter.
