## Adaptive Radiography with Trauma, Image Critique and Critical Thinking

By Quinn Carroll, Dennis Bowman

ADAPTIVE RADIOGRAPHY WITH TRAUMA, IMAGE CRITIQUE, AND CRITICAL THINKING, 1st Edition gives you a fresh perspective on radiographic positioning and critiquing in the real world. Unlike most radiography books, which approach topics in terms of the average patient under near ideal conditions, this text offers strategies and helpful tricks of the trade to employ when "the usual" does not apply. Based on developing adaptive thinking skills, the book shows you how to consider the paradigms and rules of radiology, examining and quantifying those that work while challenging those that don't. Thorough discussions on adapting beam angles, beam divergence, expansion of the light field, and spacial relations in positioning deliver the foundations of radiography and introduce quantifiable, repeatable methods. ADAPTIVE RADIOGRAPHY WITH TRAUMA, IMAGE CRITIQUE, AND CRITICAL THINKING, 1st Edition also addresses trauma and mobile radiography and positioning, changes brought about by the advent of digital radiography, routine and trauma skull positioning, and much more. Real-life case studies and critical thinking questions help you apply methods to a variety of issues and clinical settings, developing the problem-solving skills you need for success in any radiographic field.

### **Editorial Review**

#### **Review**

If this manuscript is accepted by the radiology community and its associated agencies (i.e. ASRT, JRCERT, and ARRT) it could revolutionize radiographic positioning! The author offers very practical advice on obtaining quality images with limited repeats. These are the tricks from the seasoned techs!

This text provides effective broad application guidelines for successful imaging in routine and trauma situations. This is a good read for the new graduate as well as seasoned technologists who want to refresh their general radiographic positioning and critical thinking skills. Case studies presented provide real life situations for the application of the practical tips provided.

#### **About the Author**

After 32 years as a radiography program director, Quinn B. Carroll recently took his retirement from Midland College in Texas as an assistant professor to write full time. Quinn has published three textbooks, workbooks and a number of journal articles. His newest publication is Radiography in the Digital Age, released in 2011 along with several instructional ancillaries. Quinn has presented over 120 seminars in Canada and the USA, and many dozens of presentations for state societies and the ASRT. Quinn received his Master of Education degree from the University of Wyoming and his BS degree from the University of Utah, where he also obtained his radiography training at the University Medical Center. He is a dynamic, fun speaker and very excited to be part of meeting the challenge to embrace digital technology head on.

Dennis Bowman RT(R), CRT(R)(F) has been an active radiographer for over 35 years. He has been employed as a Staff Technologist at Community Hospital of the Monterey Peninsula (CHOMP) in Monterey, California since 1990 and was the Clinical Instructor until 2014. With a digital dosimeter and a vast array of body phantoms, Dennis has put in hundreds of hours researching and studying digital techniques. In addition to the weekly classes he gives his students, Dennis has travelled internationally lecturing on how best to use and critique digital radiography. Because Dennis still is a "shooting tech" and CI, he truly understands all the problems techs run into and has figured out a fun and lighthearted way to explain it.

### **Users Review**

#### **From reader reviews:**

#### **Mario Berry:**

This Adaptive Radiography with Trauma, Image Critique and Critical Thinking are generally reliable for you who want to be a successful person, why. The key reason why of this Adaptive Radiography with Trauma, Image Critique and Critical Thinking can be one of several great books you must have is actually giving you more than just simple studying food but feed you actually with information that possibly will shock your before knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions in the e-book and printed kinds. Beside that this Adaptive Radiography with Trauma, Image Critique and Critical Thinking giving you an enormous of experience including rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day activity. So , let's have it and enjoy reading.

**James Sanford:**

Beside this particular Adaptive Radiography with Trauma, Image Critique and Critical Thinking in your phone, it can give you a way to get more close to the new knowledge or facts. The information and the knowledge you can get here is fresh from your oven so don't end up being worry if you feel like an old people live in narrow commune. It is good thing to have Adaptive Radiography with Trauma, Image Critique and Critical Thinking because this book offers to you personally readable information. Do you occasionally have book but you don't get what it's about. Oh come on, that wil happen if you have this within your hand. The Enjoyable arrangement here cannot be questionable, including treasuring beautiful island. So do you still want to miss the item? Find this book and read it from at this point!

**Ashley Johnson:**

Is it you who having spare time and then spend it whole day simply by watching television programs or just lying down on the bed? Do you need something new? This Adaptive Radiography with Trauma, Image Critique and Critical Thinking can be the response, oh how comes? A fresh book you know. You are thus out of date, spending your free time by reading in this new era is common not a nerd activity. So what these books have than the others?

**John Parish:**

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library or to make summary for some guide, they are complained. Just tiny students that has reading's spirit or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring and also can't see colorful photos on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Adaptive Radiography with Trauma, Image Critique and Critical Thinking can make you really feel more interested to read.
