

# 802.1X Port-Based Authentication

*By Edwin Lyle Brown*

## 802.1X Port-Based Authentication By Edwin Lyle Brown

Port-based authentication is a “network access control” concept in which a particular device is evaluated before being permitted to communicate with other devices located on the network. **802.1X Port-Based Authentication** examines how this concept can be applied and the effects of its application to the majority of computer networks in existence today. 802.1X is a standard that extends the Extensible Authentication Protocol (EAP) over a Local Area Network (LAN) through a process called Extensible Authentication Protocol Over LANs (EAPOL).

The text presents an introductory overview of port-based authentication including a description of 802.1X port-based authentication, a history of the standard and the technical documents published, and details of the connections among the three network components. It focuses on the technical aspect of 802.1X and the related protocols and components involved in implementing it in a network. The book provides an in-depth discussion of technology, design, and implementation with a specific focus on Cisco devices. Including examples derived from the 802.1X implementation, it also addresses troubleshooting issues in a Cisco environment. Each chapter contains a subject overview.

Incorporating theoretical and practical approaches, **802.1X Port-Based Authentication** seeks to define this complex concept in accessible terms. It explores various applications to today’s computer networks using this particular network protocol.

## **Editorial Review**

### **Users Review**

#### **From reader reviews:**

##### **Paulette Stoneman:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite reserve and reading a book. Beside you can solve your short lived problem; you can add your knowledge by the reserve entitled 802.1X Port-Based Authentication. Try to stumble through book 802.1X Port-Based Authentication as your friend. It means that it can being your friend when you really feel alone and beside that of course make you smarter than before. Yeah, it is very fortunated for you. The book makes you much more confidence because you can know anything by the book. So , we need to make new experience in addition to knowledge with this book.

##### **Robert Pinkerton:**

Have you spare time to get a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a wander, shopping, or went to the Mall. How about open or read a book titled 802.1X Port-Based Authentication? Maybe it is for being best activity for you. You realize beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have different opinion?

##### **Doris Rice:**

Information is provisions for those to get better life, information these days can get by anyone in everywhere. The information can be a understanding or any news even restricted. What people must be consider if those information which is within the former life are difficult to be find than now is taking seriously which one would work to believe or which one typically the resource are convinced. If you get the unstable resource then you get it as your main information you will have huge disadvantage for you. All of those possibilities will not happen with you if you take 802.1X Port-Based Authentication as the daily resource information.

##### **James Smith:**

The book 802.1X Port-Based Authentication will bring that you the new experience of reading a new book. The author style to clarify the idea is very unique. If you try to find new book you just read, this book very acceptable to you. The book 802.1X Port-Based Authentication is much recommended to you to study. You can also get the e-book from official web site, so you can quicker to read the book.
