Editorial Review

Review

"This outstanding book will be a great resource to hematologists in practice and in training all over the world. It is current and, with plans for continually supplementing the online version as more information becomes available, it will continue to be up to date."

-Kehinde Adekola, MBBS Northwestern University Feinberg School of Medicine

5 Star - Doody's Rating, March 2013

"There has been a significant improvement in general layout and visual appearance between the 5th and 6th editions. The book is now in full colour throughout, with numerous sections of added and useful information contained in blue and red coloured boxes...The entire text of the book, including downloadable images, is available online, and includes updates to the book - such as the recent addition of arsenic trioxide and ATRA as treatment for acute promyelocytic leukaemia...for the truly discerning haematologist, only the fullest detail will suffice, and only *Hoffman's Hematology: Basic Principles and Practice* will do."

Haemtrainee, Sept 2013
