**Iris Biometric Model for Secured Network Access** By Franjeh El Khoury

In the last few years, biometric techniques have proven their ability to provide secure access to shared resources in various domains. Furthermore, software agents and multi-agent systems (MAS) have shown their efficiency in resolving critical network problems.

**Iris Biometric Model for Secured Network Access** proposes a new model, the IrisCryptoAgentSystem (ICAS), which is based on a biometric method for authentication using the iris of the eyes and an asymmetric cryptography method using "Rivest-Shamir-Adleman" (RSA) in an agent-based architecture. It focuses on the development of new methods in biometric authentication in order to provide greater efficiency in the ICAS model. It also covers the pretopological aspects in the development of the indexed hierarchy to classify DRVA iris templates.

The book introduces biometric systems, cryptography, and multi-agent systems (MAS) and explains how they can be used to solve security problems in complex systems. Examining the growing interest to exploit MAS across a range of fields through the integration of various features of agents, it also explains how the intersection of biometric systems, cryptography, and MAS can apply to iris recognition for secure network access.

The book presents the various conventional methods for the localization of external and internal edges of the iris of the eye based on five simulations and details the effectiveness of each. It also improves upon existing methods for the localization of the external and internal edges of the iris and for removing the intrusive effects of the eyelids.

### **Editorial Review**

#### **Users Review**

##### **From reader reviews:**

##### **Glenn Flinchum:**

What do you concentrate on book? It is just for students because they are still students or the item for all people in the world, the actual best subject for that? Merely you can be answered for that issue above. Every person has different personality and hobby for each and every other. Don't to be obligated someone or something that they don't want do that. You must know how great in addition to important the book Iris Biometric Model for Secured Network Access. All type of book is it possible to see on many sources. You can look for the internet sources or other social media.

##### **William Meadows:**

This Iris Biometric Model for Secured Network Access are reliable for you who want to be considered a successful person, why. The explanation of this Iris Biometric Model for Secured Network Access can be among the great books you must have is actually giving you more than just simple examining food but feed a person with information that perhaps will shock your earlier knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this Iris Biometric Model for Secured Network Access giving you an enormous of experience including rich vocabulary, giving you demo of critical thinking that we realize it useful in your day activity. So , let's have it and revel in reading.

##### **Arthur Reaves:**

The reason why? Because this Iris Biometric Model for Secured Network Access is an unordinary book that the inside of the book waiting for you to snap it but latter it will jolt you with the secret that inside. Reading this book close to it was fantastic author who have write the book in such wonderful way makes the content inside easier to understand, entertaining means but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of positive aspects than the other book get such as help improving your ability and your critical thinking method. So , still want to hold up having that book? If I had been you I will go to the guide store hurriedly.

##### **Debra Shortt:**

Playing with family in a park, coming to see the ocean world or hanging out with pals is thing that usually you have done when you have spare time, subsequently why you don't try thing that really opposite from

that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Iris Biometric Model for Secured Network Access, you are able to enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang type is it? Oh come on its mind hangout guys. What? Still don't obtain it, oh come on its named reading friends.
