A Python Primer for ArcGIS® By Nathan Jennings

The automation of geoprocessing tasks is becoming a common practice among GIS professionals. Python is the standard programming language for ArcGIS and other fields such as remote sensing, GPS, spatial modeling, and statistical analysis. A Python Primer for ArcGIS® combines fundamental Python programming structures to help professionals automate common geoprocessing functions. Thorough explanations of programming concepts are included along with user-friendly demonstrations that enable readers to develop programs on their own. In addition, chapters contain exercises and questions that aid in the application of each chapter's highlighted principles. This book provides a practical approach to a broad range of programming skills using ArcGIS for geoprocessing and map production in the work place.

Editorial Review

About the Author

Nathan Jennings is experienced in GIS, Remote Sensing, GPS, GIS for web, geospatial technology, consulting, and business systems integration. He is a full-time GIS professional with the City of Sacramento; he has designed and currently teaches courses in GIS Programming, Remote Sensing, Web Map Application Development, GPS, and GIS software at American River and Sacramento City Colleges in the Los Rios Community College system in Sacramento. Mr. Jennings has worked in the private sector both nationally and internationally in natural resource management, in government organizations and agencies, as a consultant for public and private organizations, and as an adjunct professor. Nathan has a passion for learning, teaching, and honing his craft. When Nathan is not working for the City of Sacramento or teaching, he can be found on the hiking trails in the Sierra Nevada mountains and along the Pacific coast or gardening in his back yard. In an alternative state, he attempts to keep up with his family and a motley collection of pets. See his website for more details: www.jenningsplanet.com

Users Review

From reader reviews:

Alfredo Dunn:

As people who live in typically the modest era should be revise about what going on or data even knowledge to make them keep up with the era that is certainly always change and make progress. Some of you maybe can update themselves by examining books. It is a good choice for you personally but the problems coming to you actually is you don't know what one you should start with. This A Python Primer for ArcGIS® is our recommendation to make you keep up with the world. Why, since this book serves what you want and wish in this era.

Samantha Williams:

In this age globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. The actual book that recommended to you personally is A Python Primer for ArcGIS® this e-book consist a lot of the information on the condition of this world now. This kind of book was represented how can the world has grown up. The dialect styles that writer use for explain it is easy to understand. The writer made some investigation when he makes this book. That is why this book appropriate all of you.

Hector Medlin:

As we know that book is very important thing to add our information for everything. By a publication we can know everything you want. A book is a group of written, printed, illustrated or even blank sheet. Every year was exactly added. This book A Python Primer for ArcGIS® was filled with regards to science. Spend your

spare time to add your knowledge about your scientific disciplines competence. Some people has several feel when they reading a new book. If you know how big benefit from a book, you can experience enjoy to read a reserve. In the modern era like at this point, many ways to get book that you wanted.

Michael Blossom:

A lot of book has printed but it differs. You can get it by online on social media. You can choose the most beneficial book for you, science, comedy, novel, or whatever by searching from it. It is known as of book A Python Primer for ArcGIS®. Contain your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make a person happier to read. It is most significant that, you must aware about publication. It can bring you from one destination for a other place.
